CONFIDENTIAL — PREPARED FOR INVESTORS.

INVESTOR DECK

Salon AI

WHERE INNOVATION MEETS ITS PURPOSE

The AI-native operating system
for modern beauty businesses.

Four layers. One operating system.

01 Salon Cost Optimization

Turns color usage, materials, and waste into live business data.

The salon sees true cost, margin, and inventory impact at the moment work happens.

02 Intelligence Booking

03 Salon Management OS

04 AI Agent Engine

THE GLOBAL SALON PROBLEM

2.7M professional salons are still running on disconnected workflows.

Most salons already use software. What they are missing is an operating intelligence layer that understands how a salon actually works.

Disconnected Operations

Booking, staff, inventory, client history, and revenue all live in separate places. Nothing talks to anything else.

Invisible Losses

Material waste, empty chair capacity, and missed client follow-up are difficult to measure, so they never get fixed.

No Intelligence Layer

Generic tools record what happened after the fact. They do not understand how the salon runs or what it needs next.

THE ANSWER

LAYER 1 — LIVE & GROWING

Cost Optimization

Turns material waste into live operational data.

LAYER 2 — BUILT — TESTING

Booking Intelligence

Turns the service journey into a smarter, data-driven calendar.

LAYER 3 — SEPTEMBER 2026

Salon Operating System

Turns daily disconnected work into one live command center.

LAYER 4 — JANUARY 2027

Salon AI Agent Suite

Turns intelligence into autonomous execution across every role.

DATA → INTELLIGENCE → OPERATING SYSTEM → AUTONOMOUS EXECUTION

CONFIDENTIAL — PREPARED FOR INVESTORS.

LAYER 1
Cost Optimization

WHY WE STARTED WITH COLOR

No data. No AI.

01 No Data = No AI

The color room is the salon's operational truth. Without unique data, there is no intelligence. Without intelligence, there is no AI.

02 Foot In The Door

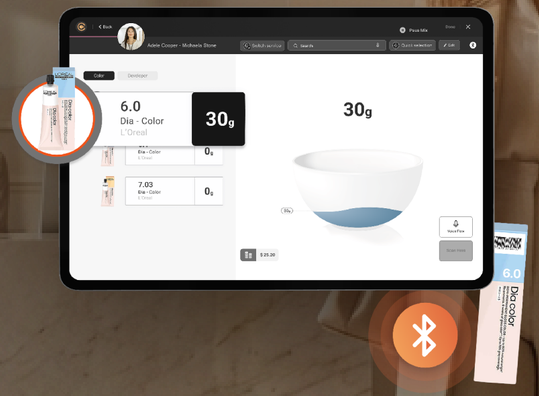

We always planned a full operating system. Starting with one painful workflow let us enter below the radar, learn the market, and build a loyal base before going broad.

03 We Built The Data AI Would Need

Spectra records what was booked, what was actually performed, which products were used, how much was consumed, by whom, on which client, and what happened afterwards.

FROM COLOR BAR TO DATA LAYER

The first workflow where waste becomes measurable.

The same layer becomes the proof engine on the next slide.

We didn't start with AI. We built the data AI would need.

LAYER 1
Cost Optimization

PROOF WE WERE RIGHT

Product-market fit. Global reach. No field sales team.

170
Paying subscriptions
$920 avg ARPU, 36+ month LTV proven

12
Countries
US, Russia, Japan, Netherlands, Portugal, Israel, Chile and more

500+
Color technicians
Using the system every workday, multiple times per day

$130K
ARR
Annual recurring revenue from current base

30.9M
Grams measured
Real color usage captured at the mixing station

556K+
Services analyzed
Actual salon workflows, formulas, timing, and outcomes

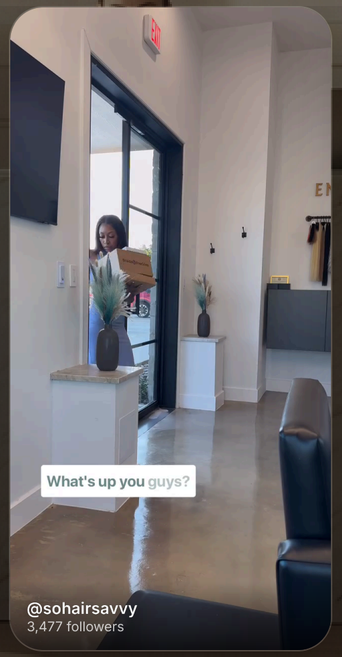

221
Brands observed
Network-wide product and shade behavior across salons

40
Months of history
Service, formula and consumption data a new AI platform cannot recreate

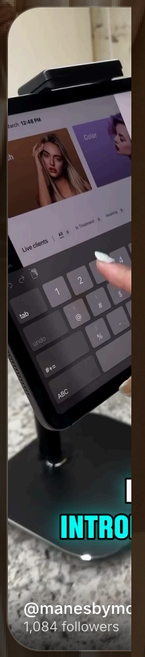

CUSTOMER PROOF United States · Russia · Japan · Netherlands · Portugal · Israel · Chile

LAYER 1
Cost Optimization

THE DATA LAYER

What Salon AI knows that no booking system can know.

30.9M grams. 556K services. 221 brands. The numbers on the previous slide become a moat only when they produce intelligence no calendar can see.

Brand share by grams
Who actually wins inside the bowl — not on invoices.

Cross-brand mixing
Real formulas combine lines. Manufacturer apps cannot see this.

Formula complexity
How hard a service is, by salon, stylist, and service type.

Toner & developer patterns
What gets used after the lift — the hidden second sale.

Shade movement
How clients actually transition over 40 months of visits.

Network benchmark
One salon versus the network, on consumption and demand.

LIVE DATA LAYER

This is what the data layer can produce today.

BRAND SHARE BY ACTUAL CONSUMPTION

Brand count is measured. Distribution shape is from observed consumption.

556K+
FORMULA COMPLEXITY
services with mix, steps, timing

221
CROSS-BRAND MIXING
brands observed inside live formulas

Grams
TONER USAGE
connected to service and client

Shade Movement
40 mo · longitudinal client history

Network Benchmark
12 · countries of comparable consumption

30.9M grams, 556K+ services, and 221 brands compound into a data moat no new platform can recreate.

LAYER 1
Cost Optimization

MARKETING BREAKTHROUGH

The Triple Bundle.

A proven go-to-market engine built and tested in 2025.

BUNDLE PACKAGE

30-Day Free Trial
Full access, no commitment required.

Free Equipment
Smart Scale and Premium Stand included.

Custom Training
Complete onboarding and setup included.

2025 SALES FUNNEL

LEADS	TRIALS	CUSTOMERS
1,476 (100%)	301 (20.4%)	96 (32%)
$27	$133	$417
Cost per lead	Cost per trial	Cost per customer

This funnel ran before the AI operating layer. Faster follow-up should improve these metrics further.

CAC BREAKDOWN

Meta Ads (12 months)	$18,000
Campaign Manager	$15,000
Equipment Gifts	$7,000
Total CAC	**($40,000)**

3-YEAR COHORT LTV (96 CUSTOMERS)

2025 ARR (Actual)	$64,728
2026 ARR (5% churn)	$61,492
2027 ARR (5% churn)	$58,417
3-Year LTV	**$184,637**

$40K	$185K	$145K	4.6x
Total CAC	3-Year LTV	Net Return	LTV:CAC

We proved the product sells, onboards, and retains remotely. Then we paused marketing and built the platform.

LAYER 2
Booking Intelligence

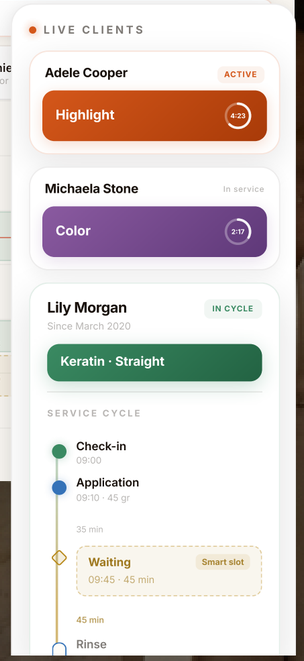

BOOKING INTELLIGENCE

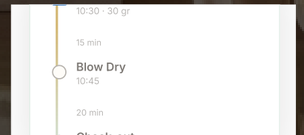

The booking is only the first signal.

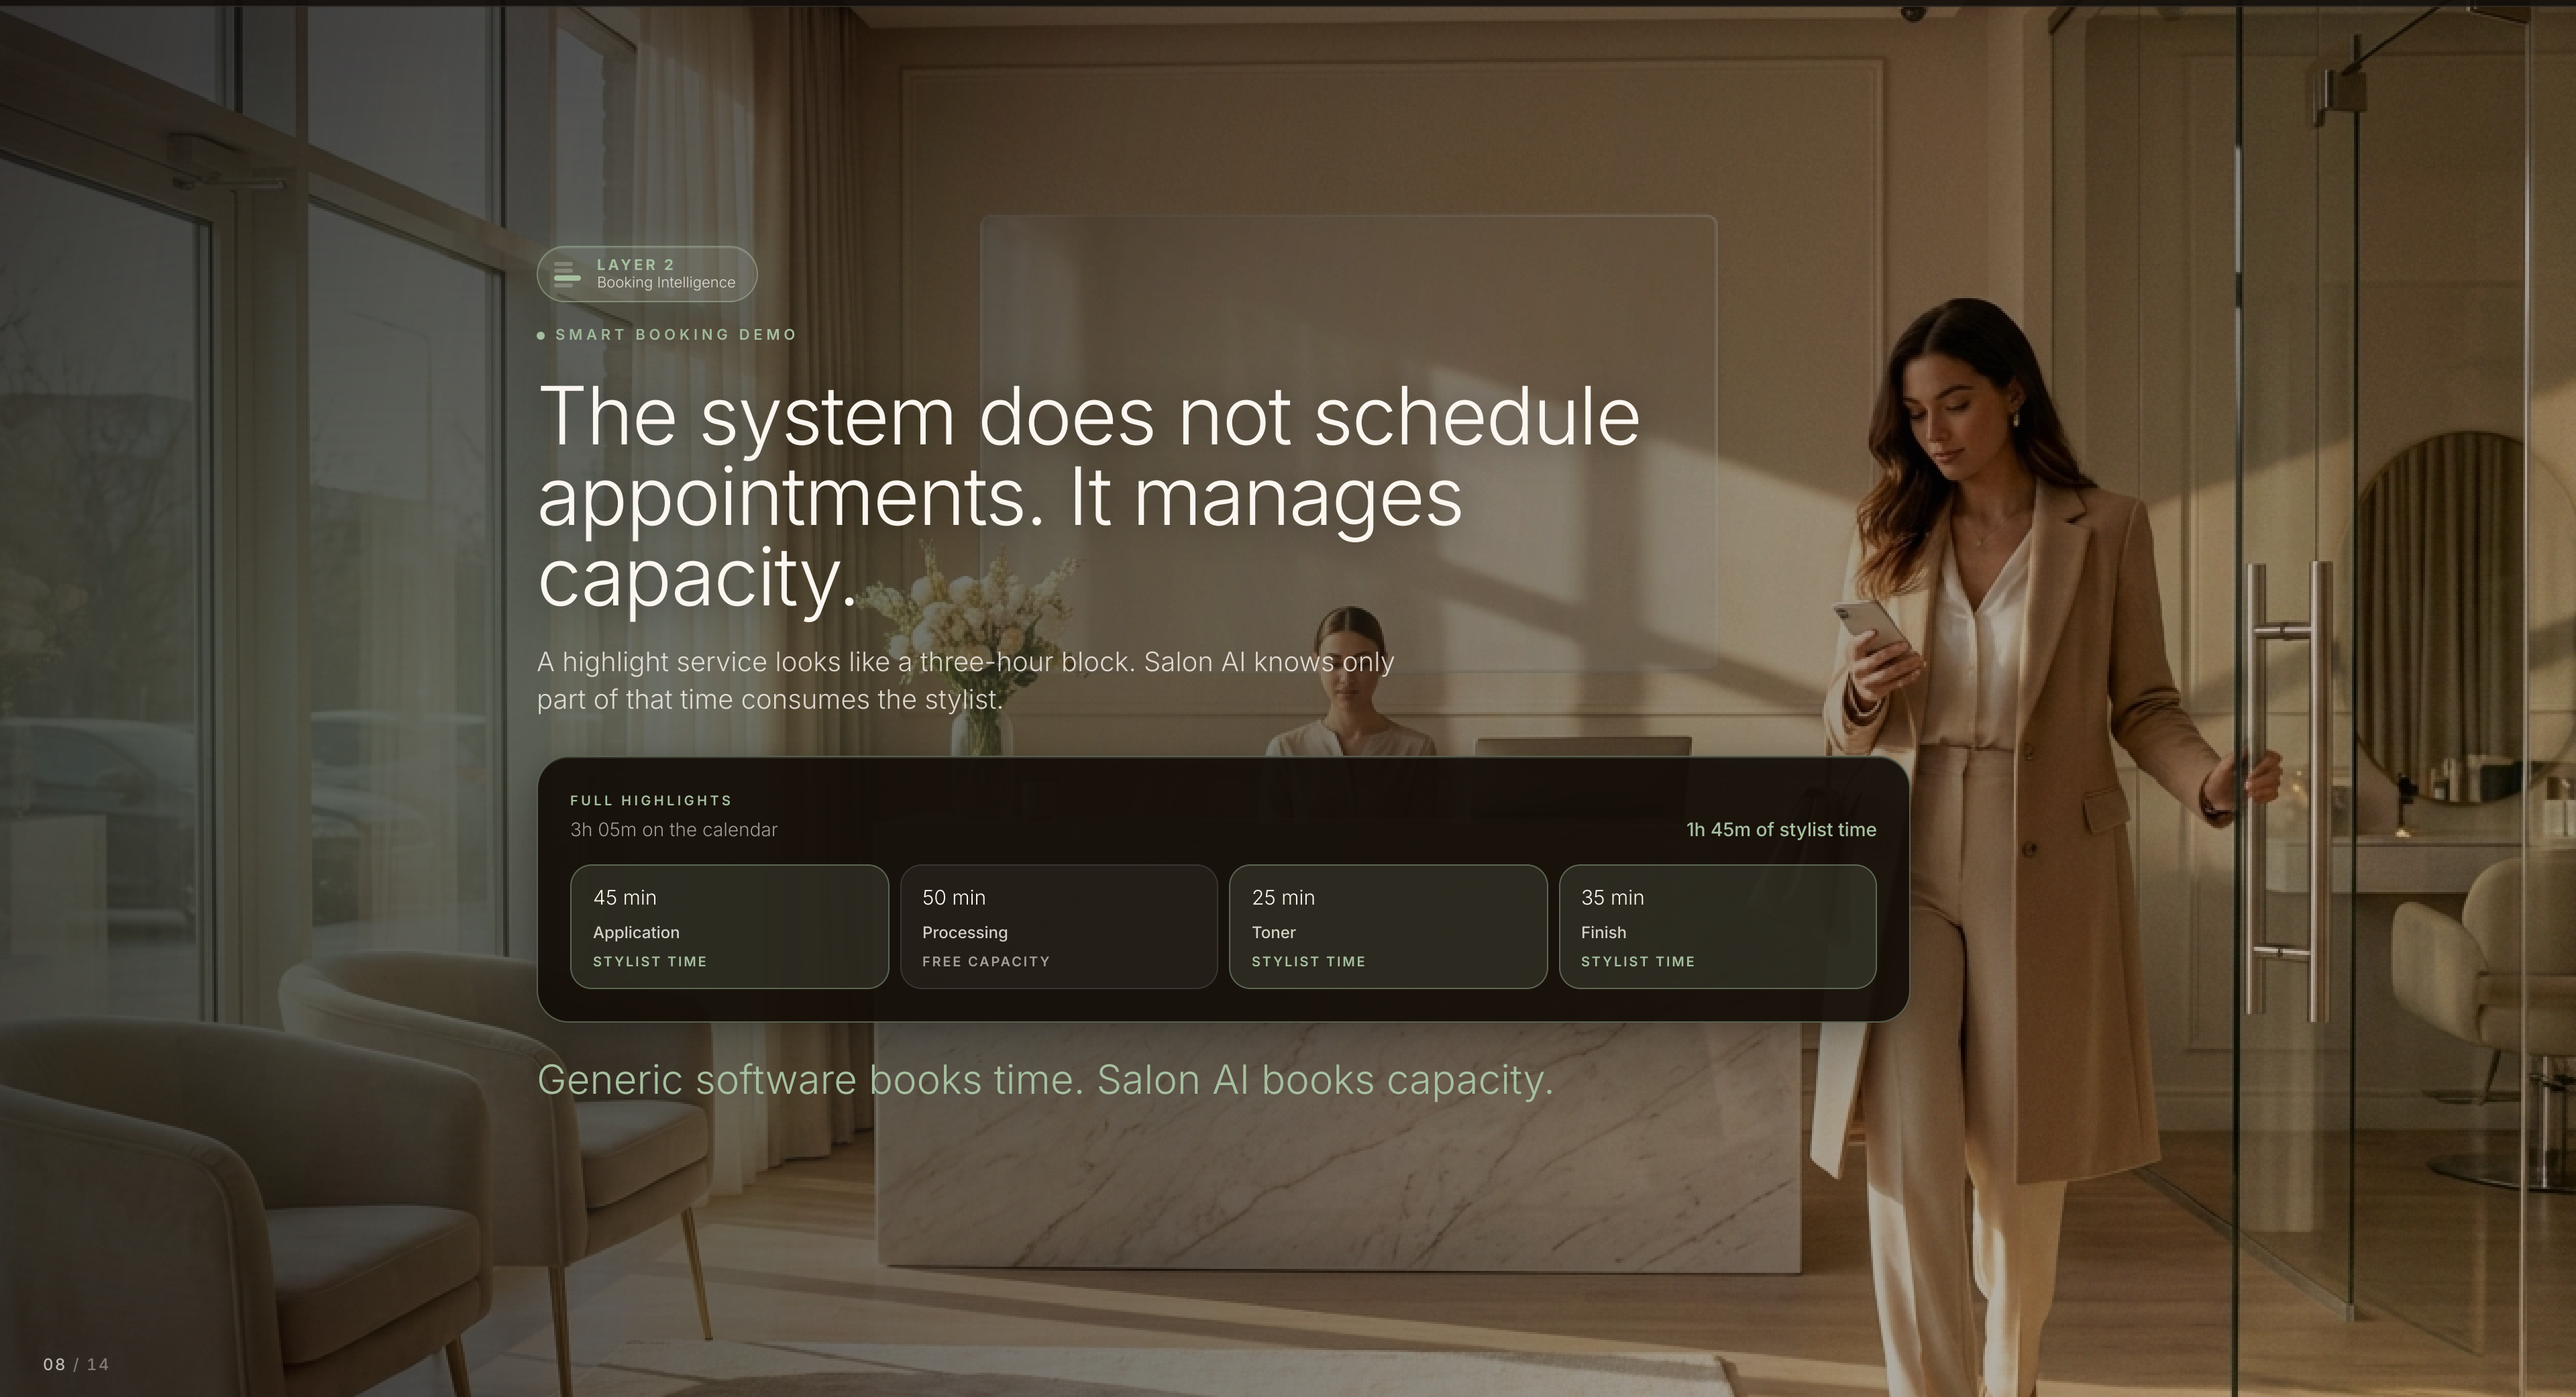

A client books a full color journey. Salon AI follows every step from highlights and mixing to processing and checkout, tying each moment to the layer that knows the truth.

THE CALENDAR IS NO LONGER BASED ON ESTIMATES. IT IS BASED ON REALITY.

LAYER 2
Booking Intelligence

SMART BOOKING DEMO

The system does not schedule appointments. It manages capacity.

A highlight service looks like a three-hour block. Salon AI knows only part of that time consumes the stylist.

FULL HIGHLIGHTS

3h 05m on the calendar

1h 45m of stylist time

45 min	50 min	25 min	35 min
Application	Processing	Toner	Finish
STYLIST TIME	FREE CAPACITY	STYLIST TIME	STYLIST TIME

Generic software books time. Salon AI books capacity.

CONFIDENTIAL — PREPARED FOR INVESTORS.

LAYER 3
Salon Operating System

SALON OPERATING SYSTEM

Every decision. Before it happens.

PHASE 1 — SEPTEMBER 2026

The owner command center: today's revenue, clients in salon, utilization, next capacity, at-risk revenue, staff load, inventory alerts, and AI recommendations — from the same operating layer.

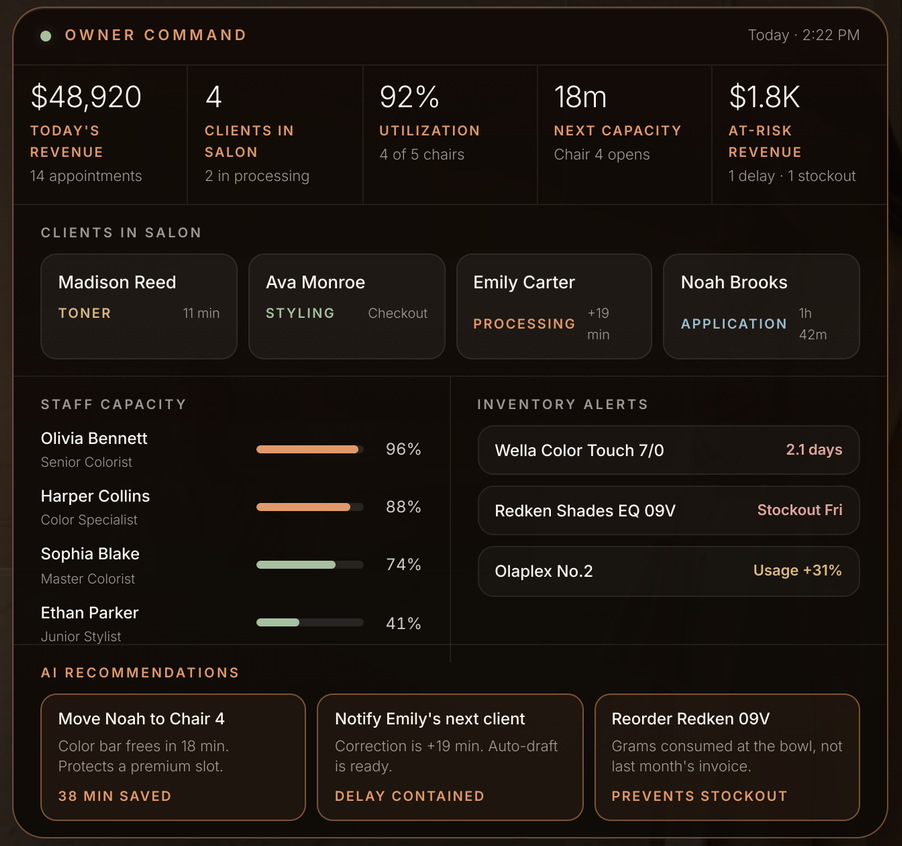

MESSAGES
Updates, confirmations, win-backs

STAFF
Chair flow, delays, handoffs

SUPPLIERS
Orders and delivery windows

INVENTORY
Usage velocity and stockout risk

AI AGENTS
Recovery and next-best actions

LAYER 4
Salon AI Agent Suite

MISSION CONTROL INTELLIGENCE

The engine that sees the whole salon.

COST OPTIMIZATION

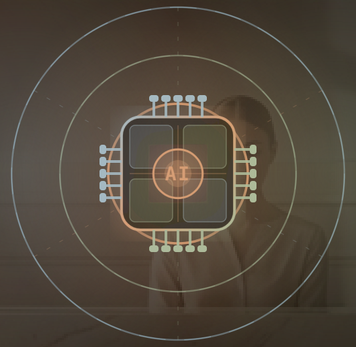

Inventory
Brand, shade, grams, movement

Formulas
Success, variation, mix

Colorists
Habits, waste, preferences

Velocity
Fast, slow, seasonal demand

Cost
Service cost, margin, waste

Salon Intelligence Engine
Every signal flows into one model

Clients	Staff	Products
Services	Inventory	Revenue
Scheduling	Communication	

BOOKING INTELLIGENCE

Services
Type, duration, combinations

Clients
Visit cycle, retention, LTV

Timing
Apply, process, toner, finish

Staff
Capacity, utilization

Revenue
Peaks, gaps, revenue per hour

No booking system captures operational reality at the bowl and service behavior on the floor.

LAYER 4
Salon AI Agent Suite

THE SALON AI AGENT NETWORK

The Salon Starts Running Itself.

Generic AI has prompts. Salon AI has operational truth.

Every agent operates on live booking, client, employee, service, inventory, and material-consumption data.

01	02	03
Executes workflows	Updates systems	Operates 24/7

From insight to action. From software to execution.

EXECUTING

Booking Agent

Fills chairs using real service timing, not static time blocks.

EXECUTING

Growth Agent

Targets the clients and services the consumption data says will convert.

EXECUTING

Inventory Agent

Reorders from grams consumed at the bowl, not from last month's invoice.

SALON AI
Live Control

EXECUTING

Retention Agent

Sees shade history and visit cycles — not just a last-appointment date.

EXECUTING

Operations Agent

Watches live floor load, delays, and material risk as they form.

BUSINESS MODEL EVOLUTION

Each layer expands ARPU and opens new revenue streams.

$4,860

REVENUE PER SALON

$960 today → 5× annual expansion

+ BOOKING	+ SALON OS	+ SALON AI

THE VISION

We Started With One Gram Of Color.

We Are Building The AI Operating Layer For Salons.

Data → Intelligence → Operating System → Autonomous Execution

We entered through the one workflow nobody else could measure. That gave us proprietary data. We expanded that data model into the full salon. Now we can build an AI operating layer on top of it.
