INVESTOR EDITION

We solved the hardest part.
Now we're building the autonomous salon.

If a car can drive itself, why can't a salon run itself?

Maor Ganon & Elad Gotlieb · September 2026

THE HIDDEN ECONOMICS OF EVERY SERVICE

You know what you charge.
You don’t know what the service really costs.

PRICE ≠ COST ≠ PROFIT

If the work is not measured, the profit cannot be managed.

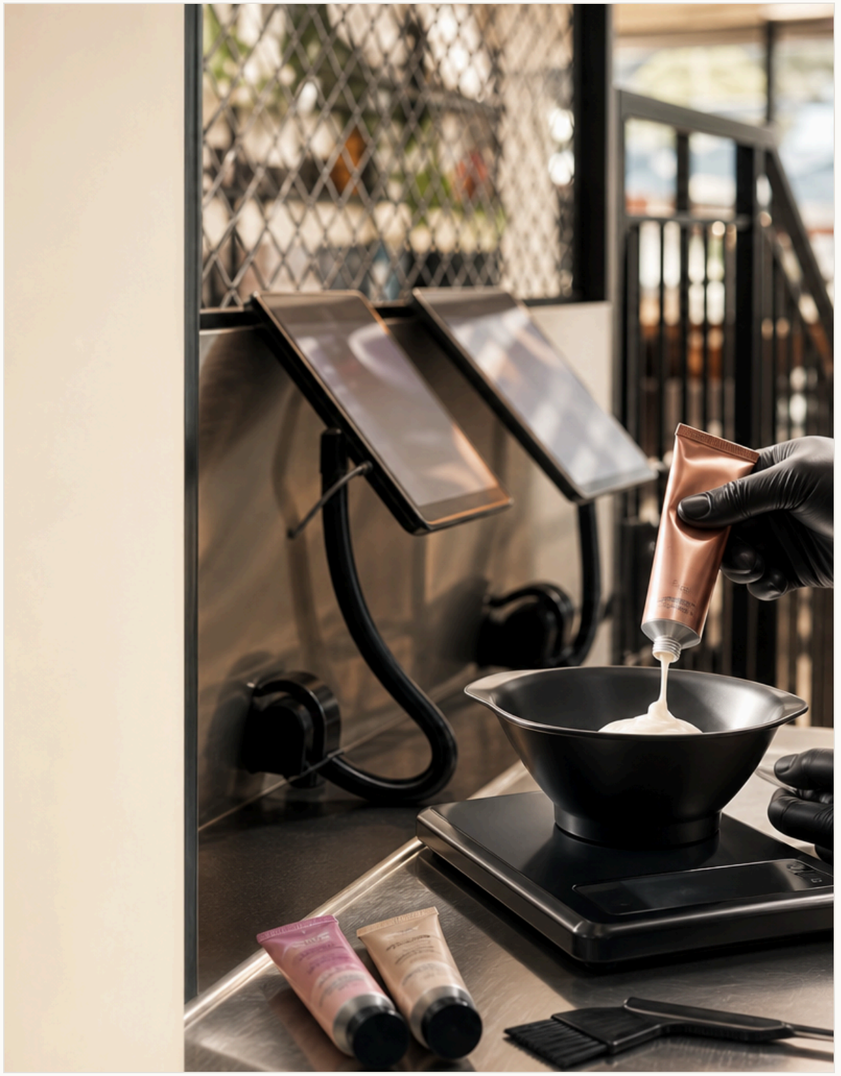
WE BUILT THIS — AND IT WORKED IN ISRAEL

We made every gram measurable.

Scan → Mix → Measure → **Record**

- Less waste
- Real cost per service
- Inventory based on actual usage
- Formula history for every client

This was not a theory. We built a real product people pay for.



WE DELIBERATELY TRIED TO BREAK THE MODEL

Israel proved salons would use it.

170+	12	617K+
PAYING SALONS	PROFESSIONALS	COLOR SERVICES MEASURED

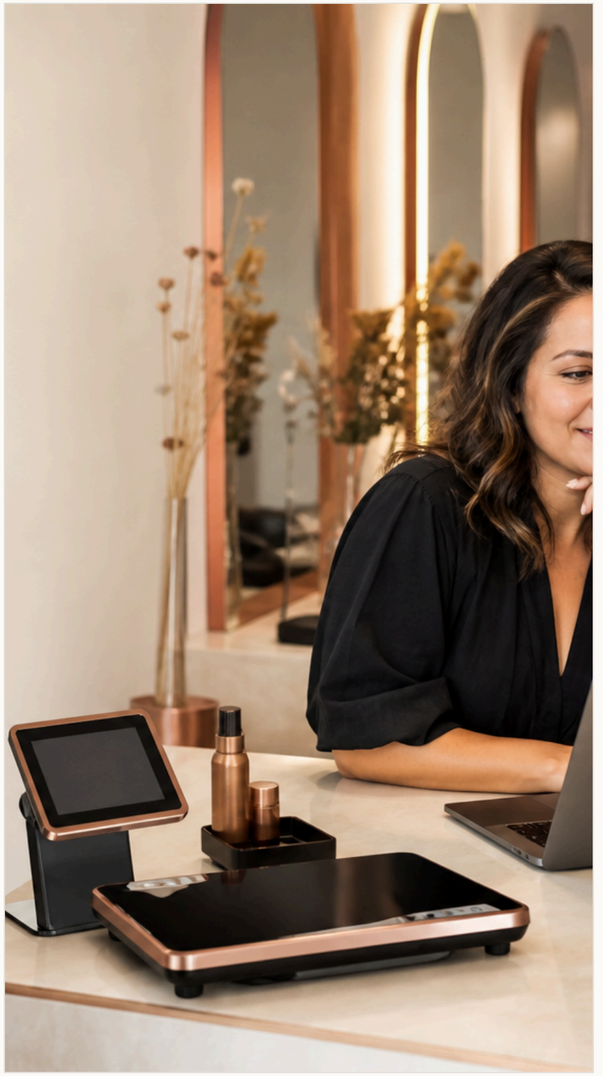
A real product. Real daily use. Real recurring revenue.

THE REPEATABLE ACQUISITION TEST

We learned how to acquire salons remotely.

Lead → Demo → Trial → **Paid salon**

1,476	301	96
LEADS	TRIALS	PAYING SALONS



$40K in marketing produced 96 paying salons.

THE MISSING LINK IN PROFESSIONAL BEAUTY

Salon sees the booking. Brand sees the sale. Neither sees the real service.

SALON

Sees the booking

BRAND

Sees the sale

THE BLIND SPOT

Neither sees the real service

Spectra measures what was actually done, consumed and cost.

WITHOUT INTENDING TO — WE BUILT A DATA LAYER NO ONE ELSE HELD

Every bowl became a data point.

And already today in Israel this information can be used to help manufacturers and distributors understand real usage on the floor.

We didn’t build a survey.

We built a live measurement layer.

FROM THE WEDGE TO THE PLATFORM

Color gave us the first operational truth. Now we expand it across the salon.

Color → Clients → Team → Calendar → Inventory →

Financials

One wedge becomes a complete operating system.

ONE INTELLIGENCE LAYER FOR THE WHOLE SALON

Salon AI runs around the real work.

One context connects clients, team, calendar, inventory and financials.

TWO TRANSACTIONS. ONE CONNECTED POSITION.

Spectra sits at both transactions.

BRAND → SALON → CLIENT

BRAND → SALON

Procurement, inventory and products

SALON → CLIENT

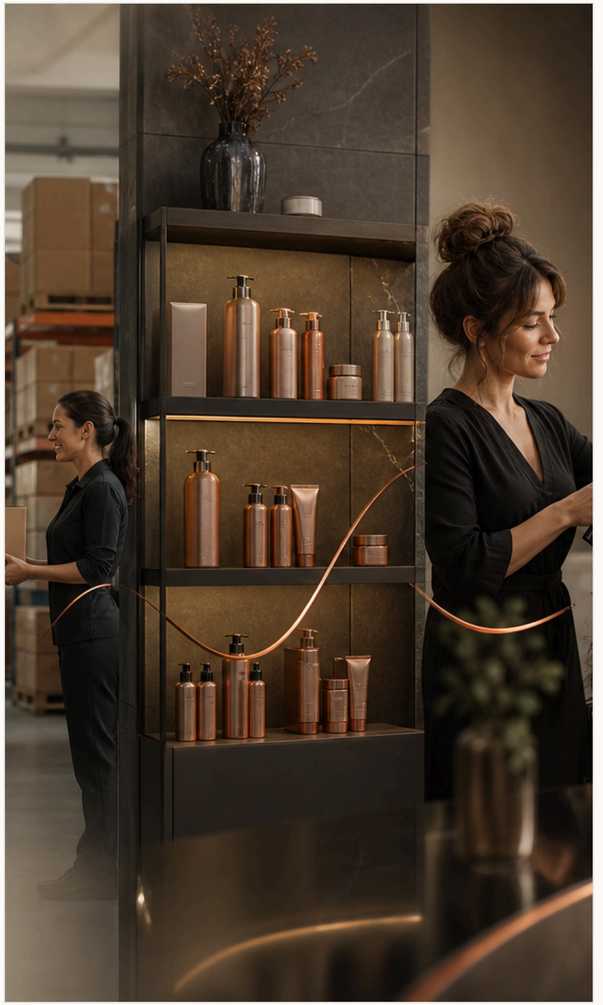
Recommendation, service and purchase

Spectra connects the product purchase to the service outcome.

THE DISCONNECTED INDUSTRY CHAIN

Each step sees only its own transaction. Spectra can connect the chain.

Brand → Distributor → Salon → Professional → Service → Client



Spectra — one intelligence layer across the entire chain

From the product sold to the service actually performed.

ONE POSITION ACROSS THREE VALUE LAYERS

Services. Products. Intelligence.

$285B

SALON SERVICES

Where the work and the client meet

$636B

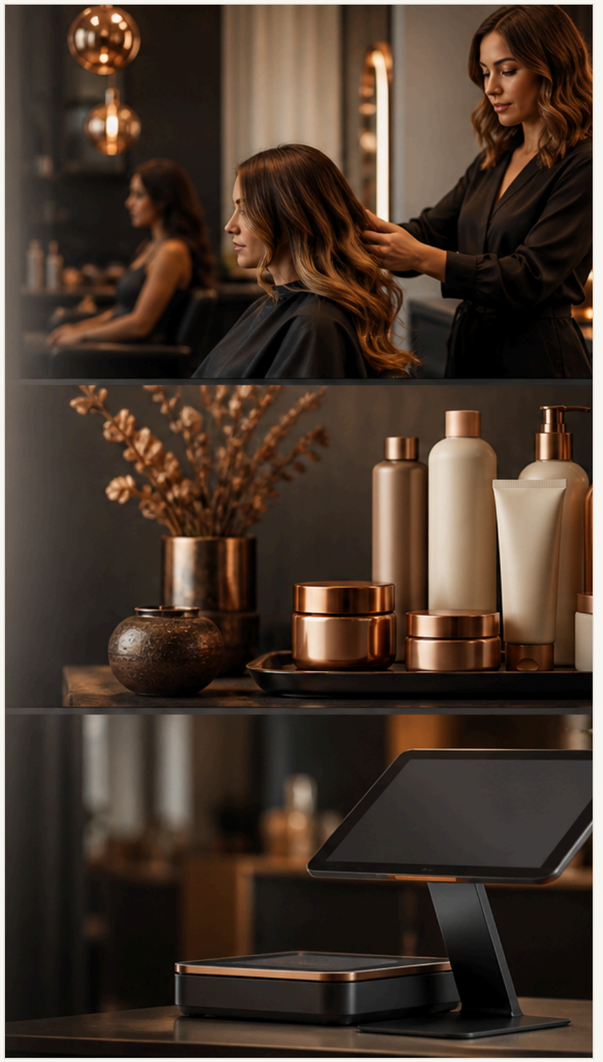
BEAUTY PRODUCTS

What is sold and consumed around the service

LIVE DATA

INTELLIGENCE

What happened, what was used and what comes next



Spectra connects all three through the salon.

THE BUSINESS MODEL EXPANDS WITH THE CUSTOMER

Same salon. More value. More revenue.

01

SOFTWARE

Core salon workflows

02

AI

Automation and intelligence

03

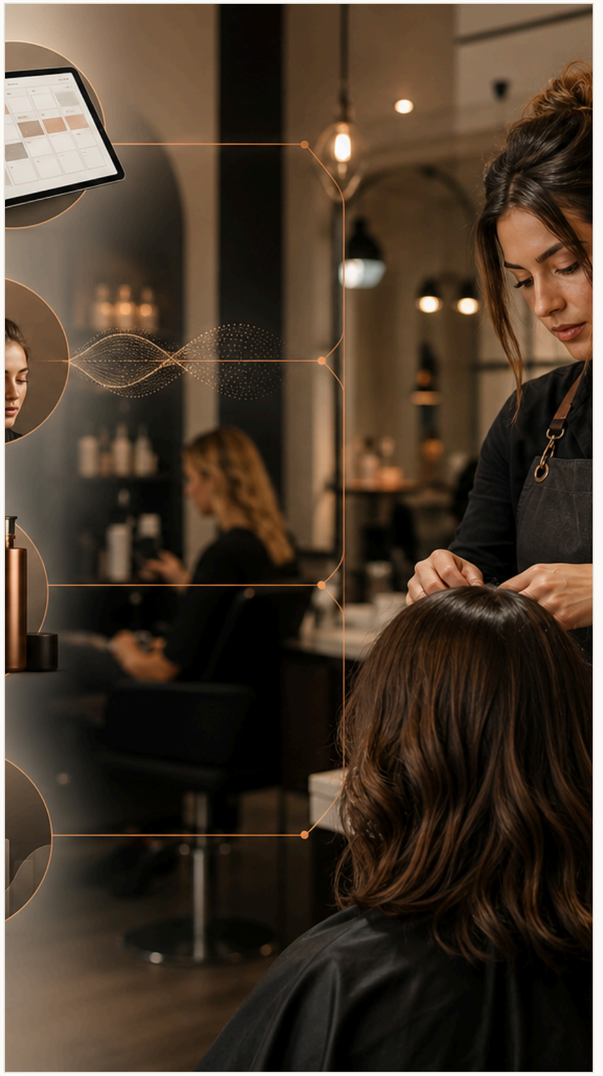
COMMERCE

Procurement and marketplace

04

BRAND INTELLIGENCE

Aggregated, permissioned insights

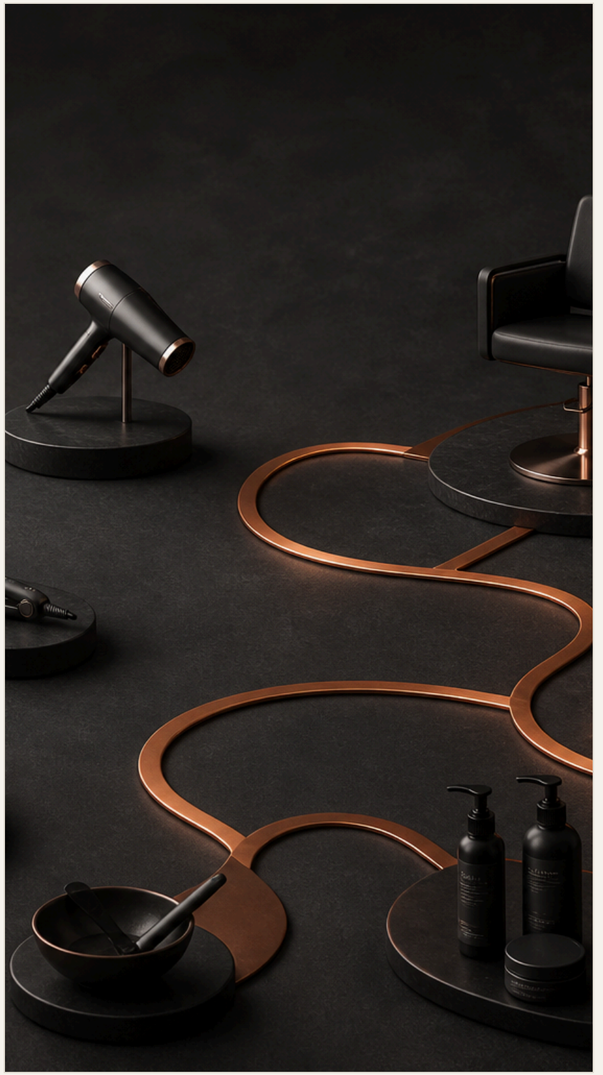


One customer can grow with us across four value layers.

THE COMPETITIVE DIFFERENCE

Competitors own pieces. Spectra connects the whole workflow.

SALON SOFTWARE	COLOR INTELLIGENCE	SPECTRA
Calendar + CRM	Material + cost	**Physical execution**
Payments	Color inventory	**Salon management**
Does not see physical execution	Does not run the salon	**Product usage**



The advantage is not another feature. It is the connection between work, business and product.

BETTER INTELLIGENCE STARTS WITH BETTER INPUTS

Most salon AI sees the software record. Spectra also sees what actually happened.

OTHER SYSTEMS KNOW

- Bookings
- Payments
- CRM

SPECTRA CAN ADD

- What was actually done
- Products used
- Time required
- True cost
- Inventory movement

Better inputs can create better intelligence.

A DIRECT PATH FROM TRUST TO COMMERCE

Connect professional advice directly to commerce.

A recommendation based on the diagnosis and service can become a relevant purchase.

DIAGNOSIS → **RECOMMENDATION** → **PURCHASE**

The salon is not only a service point. It is a moment of trust and purchase.

$1M SEED ROUND

We proved the wedge. Now we need to prove the platform.

Three clear milestones for the new capital.

BUILD
Complete Salon OS + AI

→

DEPLOY
Expand across existing salons

→

REOPEN GTM
Accelerate U.S. distribution

$1M

The goal: platform adoption, repeatable GTM and higher ARPU.

THE TEAM

We lived the workflow before we built the software.

We are not a software team that entered the beauty world. We come from:

Maor Ganon

CEO / PRODUCT

Professional stylist and salon owner building from inside the workflow.

Elad Gotlieb

CO-FOUNDER / OPERATIONS

Finance and operations that turn vision into a working company.

THE CLOSE

We started by measuring one bowl of color.

Bowl → Service → Data → Intelligence → **Autonomous salon**

Spectra is building the operating and data layer for professional beauty.
