PROFESSIONAL BEAUTY DATA

617K+ MEASURED SERVICES / 34.0M GRAMS MEASURED / 1 ACTIVE INDUSTRY DATA PILOT

It started with one problem inside the salon.

Spectra began with a very specific problem inside the salon: professional color. It is one of the largest material costs in the business, and almost none of it was measured at the point of service.

So we built a system that could see the service itself: the formula, the product, the shade, the grams, the client and the cost. Salons adopted it, and it spread across countries.

Every service quietly created something we had not planned for at the beginning:

Data.

A structured record of what actually happened inside the work.

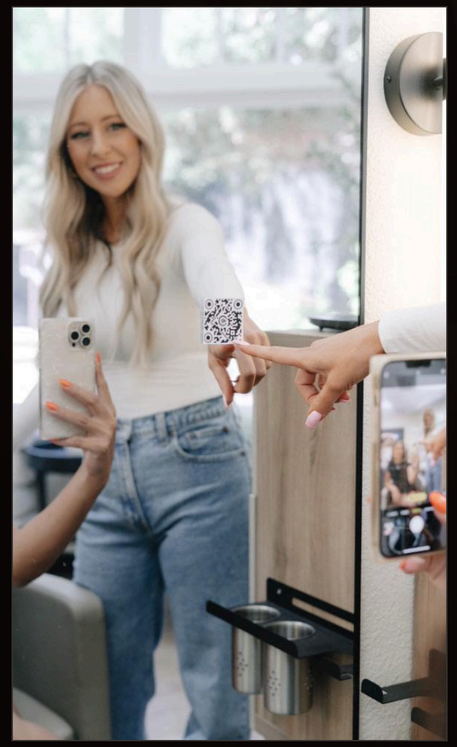

That record is what changed our view of what Spectra could become.

Spectra was born inside the salon, not inside a software company.

So we built Color Intelligence.

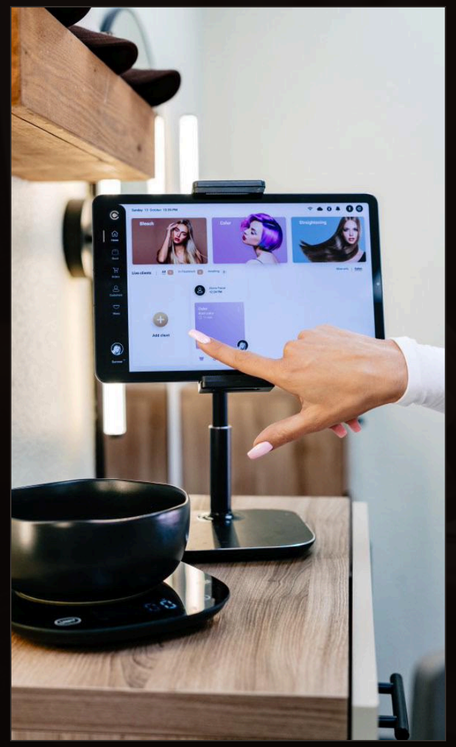

A simple app.

SALON AI

We started by measuring one bowl of color.

Bowl → Service → Data → Intelligence → Autonomous salon

CORE CAPABILITIES

Intelligent Salon Operations

Understands demand, time, skills and profitability.

Autonomous inventory

Predicts consumption, exceptions and reorders.

Owner agent

Summaries, exceptions and actions for the owner.

Spectra is building the operating and data layer for professional beauty.

Same connected salon. More value. More revenue layers.

THREE STRATEGIC MISSIONS

01 Complete

Finish Salon OS and the foundation of Salon AI.

02 Expand

Bring Salon OS across the existing salon network and learn from real daily operations.

03 Scale

Grow the proven acquisition engine with a leaner AI-native GTM model.

USE OF FUNDS

PRODUCT & ENGINEERING

Complete Salon OS and build the Salon AI foundation.

CUSTOMER EXPANSION

Expand Salon OS across the existing salon network and learn from real daily usage.

GROWTH

Scale the acquisition motion we already proved, using a leaner AI-native GTM model.

DATA / INDUSTRY

Expand the intelligence layer for brands and distributors.

OPERATIONS

Keep the company lean while supporting international execution.

We already proved the wedge. This round is about proving the platform.

STRATEGIC EXIT

The layer we are building could be strategically valuable to some of the largest players in beauty, software, distribution and data.

01 PROFESSIONAL BEAUTY

L'Oréal · Estée Lauder · Wella Company · Henkel

Direct visibility into real salon consumption, professional behavior and service-level product usage.

02 SALON SOFTWARE

Zenoti · Fresha · Phorest

Add the physical execution and product-consumption layer that booking, CRM and POS do not naturally see.

03 DISTRIBUTION & COMMERCE

SalonCentric · CosmoProf / Beauty Systems Group · State Beauty Supply

Connect actual consumption directly to replenishment and professional purchasing.

04 DATA & MARKET INTELLIGENCE

NielsenIQ · Circana

Add proprietary professional-beauty execution data to existing consumer and retail intelligence.

Different buyers. One intersection: workflow, consumption, software and data.

One gram of color.

That gram became a formula. The formulas became hundreds of thousands of real service events. The events became an operating data layer. And that layer is becoming Salon AI.

Now we're building the rest.
