

Maor Ganon & Elad Gottlieb

CO-FOUNDERS OF SPECTRA

We started with color. Now we're building Salon AI.

Spectra is already operating in 170+ salons across 12 countries. What we learned there changed the size of the opportunity.

WHAT WE'VE BUILT SO FAR

170+ SALONS / \$130K ARR / 12 COUNTRIES / 500+ PROFESSIONALS / 30.9M GRAMS MEASURED

It started with one problem inside the salon.

Spectra began with a very specific problem inside the salon: professional color. It is one of the largest material costs in the business, and almost none of it was measured at the point of service.

So we built a system that could see the service itself, including the formula, the product, the shade, the grams, the client and the cost. Salons adopted it, and it spread across countries.

Every service quietly created something we had not planned for at the beginning: a structured record of what actually happened inside the work. That record is what changed our view of what Spectra could become.

*Spectra was born inside the salon, not
inside a software company.*

So we built Color Intelligence.

Scan. Mix. Measure. Remember.

It gave salons control over formulas, material usage and inventory, measured while the work happened.

Spectra Color Intelligence in daily salon use, 2026.

CONNECTED SCALE · TABLET · BARCODE SCAN

Every service created a structured operational event.

*For the first time, software
could see the work itself.*

Salons adopted it.

This was not a prototype. It became a real operating product.

REAL SALONS. REAL DAILY USE.

SUMMER

KENDALL

SERINA RENEE

BRI STANGLE

Professionals working with Spectra across 12 countries.

Then we realized we had built something bigger than a color tool.

Every time a colorist used Spectra, the system captured what actually happened inside the service.

FORMULA · PRODUCT · SHADE · CLIENT · PROFESSIONAL · GRAMS · TIME · COST

What was actually done.

Industry data usually starts when a product is shipped, sold or booked. Spectra starts one level deeper, inside the service itself.

MANUFACTURER / DISTRIBUTOR	What shipped
POS	What sold
BOOKING	What was scheduled
SPECTRA	What was actually done

556K+

REAL SERVICE EVENTS

40 MONTHS OF HISTORY / 465K+ CLIENT VISITS / 221 BRANDS OBSERVED

Software can be rebuilt. History has to be earned.

MORE SALONS · MORE SERVICES · MORE CONTEXT · MORE TIME

The asset compounds.

A SMALL QUERY. SIX SALONS.

65%

of the color material
consumed was Brunette.

6 SALONS / 30,111 SERVICES / 5,438 CLIENTS / 1,209 kg MATERIAL

Directional snapshot · 6 real Spectra salons in Israel · not representative of the full market

TOP CONSUMED SHADES

NEW INOA 6.0		96.6 kg
NEW INOA 7.0		84.5 kg
NEW INOA 7.11		38.2 kg
MAJIREL 6.0		31.7 kg
NEW INOA 8.0		26.6 kg

Measured by product actually consumed in services, not product purchased.

25.2%

of clients changed colour
direction.

1,372 journeys across 5,438 clients, measured as a change in formula, depth or tone.

One data
layer. Two
markets.

FOR SALONS

Business intelligence: material cost, service economics, capacity and client retention.

FOR THE INDUSTRY

Product, demand and portfolio intelligence for manufacturers and distributors.

Millions of salons run on software. Very few run as one connected business.

Once we looked beyond color, we saw the same problem everywhere.

Booking knows appointments. POS knows payments. Inventory knows stock. CRM knows customers. None of them understands the whole operation.

So we stopped thinking about color software.

And started building the operating system around it, on top of the data layer we already owned.

Color was the wedge. The salon is the platform.

ONE OPERATING CONTEXT. THREE CONSEQUENCES.

01 CAPACITY

A three-hour service is not three hours of stylist capacity.

Salon calendars schedule time. Spectra models the capacity that is actually available.

APPLICATION	PROCESSING	NEXT STEP	FINISH
45m	60m	30m	45m
Stylist busy	Capacity released	Stylist busy	Stylist busy

Booking Intelligence, built and in testing. Processing time is released back into the day.

Once we understand the service, we can understand the economics around it.

One pilot salon, 12 months of its own operating economics, not Spectra revenue.
Real Salon OS product, current pilot and development environment. All figures in USD.

BOOKED SERVICE VALUE 12 months · estimated \$216,720 Estimated from completed appointments in this salon.	PERIOD MATERIAL COST 12 months · estimated \$34,830 \$45 average material per completed visit x 774 visits.	OPERATING EXPENSES 12 months · estimated \$134,366 Estimated operating layer: rent, payroll, utilities and overhead.	NET PROFIT pilot preview \$47,524 Revenue minus materials minus operating expenses.
---	---	--	---

REVENUE BY CATEGORY

ALL SERVICES

SERVICE	REVENUE	AVG PRICE	AVG MATERIAL	DURATION
Root Touch-up	\$40,500	\$180	\$32	60 min
Full Highlights	\$58,520	\$380	\$68	120 min
Gloss Toner	\$8,400	\$120	\$22	30 min
Keratin Treatment	\$56,400	\$600	\$108	180 min

Material averages per service. A visit can include more than one service, so the period material cost above is built from an average per completed visit.

What was done. What was used.
What was earned.

The whole salon, in your hand.

See who's working. Who's in the chair. What's coming next. What needs attention. And what the business is doing, without being there.

Leave the salon. Don't lose the salon.

OWNER · TEAM · CLIENT

One business. One operating context.

Designed owner experience, in development. Not live today.

The same context follows the client too.

THE CLIENT SIDE

The client books, and buys,
inside the same context.

The salon already knows her formula, her cycle and her products. The client app turns that context into a booking and a purchase, without the salon chasing either one.

Designed client experience, in development. Not live today.

Product photography and names are real rows from the salon's L'Oréal Professionnel catalog. Prices are illustrative, in USD.

CLIENT BOOKING

CLIENT RETAIL

*When one system sees the whole salon, AI
finally has something useful to work with.*

NOW AI HAS SOMETHING MOST AI DOES NOT:

Context.

It knows the client, the calendar, the service, the products, the economics and the history.

CLIENT · TEAM · CALENDAR · SERVICE · INVENTORY · ECONOMICS · HISTORY

Stock running out → Reorder prepared

Client outside her cycle → Win-back prepared

Recoverable time in the calendar → Schedule move suggested

BOOKING · INVENTORY · RETENTION · OPERATIONS · GROWTH

One shared context. Specialized agents around it. The owner approves the action.

Designed Salon AI mobile direction. Not live today.

We started with color. The opportunity is the operating layer of the salon industry.

Millions of salons worldwide

SALONS An operating system and an intelligence layer for the business they run every day.	Spectra operating data layer	INDUSTRY Manufacturers, distributors and suppliers who see shipments and sales, but not real consumption.
---	---	---

Every salon creates operating data. Aggregated correctly, the same data can become intelligence for the companies supplying the industry.

Industry intelligence is a direction we are building toward, not a product sold today.

THE PEOPLE BEHIND THE NEXT CHAPTER

We did not arrive here with an idea.
We arrived here with a company.

Maor Ganon
FOUNDER / SALON DOMAIN /
PRODUCT / AI

Elad Gotlieb
OPERATIONS / FINANCE /
COMMERCIAL

Achela	ENGINEERING / PLATFORM

BACKED BY

People who believed before this vision was obvious.

Yoav Horovitz	INVESTOR & BOARD	Brian Cooper	EARLY INVESTOR	Oren Revach	INDUSTRY OPERATOR
Paul Hagag	DATA ADVISOR	Aquilo	STRATEGY & GROWTH		

Oren, Paul and Aquilo contribute expertise and are not investors in the company.

We already know we can acquire salons.

2025 cohort over 11 months. 1,476 leads, 301 trials, \$64.7K cohort ARR. Not current company ARR.

LTV and the LTV to CAC ratio are modeled on the 2025 cohort, not realised results.

The same salon can grow with us.

Same salon. More workflows. Higher annual value.

Product-economics model, not a revenue forecast. The later layers still require completion and adoption.

\$600K to finish the transition from Color Intelligence to Salon AI.

The customers, data and team already exist. Significant parts of the new platform are built. This capital completes the transition and restarts growth.

FINANCING CONTEXT

Spectra has raised \$1M+ over its life.

The instrument began at a \$4.25M reference valuation. Approximately \$400K has already been invested under it, and the new capital extends the same financing path.

Rounded figures for orientation. This is an extension of the existing financing instrument, not a new priced round.

BUILD	PROVE	GROW
Finish Salon OS and Salon AI.	Deploy across the existing customer base and validate the expanded model.	Restart acquisition and prepare for international scale.

THE STEP AFTER THIS

\$3M to \$5M growth round

Targeted after product, revenue and market validation milestones, to fund international expansion, sales infrastructure, AI development and industry intelligence.

The previous capital built the company and the data asset. This capital turns them into the next platform.

Extension of the company's most recent financing instrument rather than a new priced round, subject to board, investor and legal approval. An advisory engagement carries performance-linked and equity-based compensation. Forward-looking milestones depend on product completion, adoption, growth and market conditions.

WHERE WE STARTED

One gram of color.

That gram became a formula. The formulas became hundreds of thousands of real service events. The events became an operating data layer. And that layer is becoming Salon AI.

Now we're building the rest.

With appreciation,

Maor Ganon and Elad Gotlieb

CO-FOUNDERS, SPECTRA
